Seeking a Physics Teacher?

To: The Principal,
Re: Finding a Physics Teacher

Vicphysics Teachers' Network is often contacted by schools who are having difficulty finding a physics teacher to be a LSL replacement, to fill an ongoing position or just to cover an extended sick leave.

So we have decided to make our website and regular email newsletter available to schools to cover such short and long term physics teaching vacancies.

The website, <https://www.vicphysics.org/>, which has over 600 visits per day, will have a detailed description of the vacancy, while will be listed here at <https://www.vicphysics.org/jobads.html>. The fortnightly newsletter, which is distributing to over 1000 working and retired physics teachers in Victoria, will include a listing of all vacancies.

The cost is \$100 for two months' display. To simplify the financial aspects, the payment is to be by EFT to the Vicphysics Teachers' Network account at Bank Australia with BSB 313 140 and account number 12146397. The customer reference should be the school name. A receipt will be issued and an invoice can be provided.

Information about the position is to be entered online at <https://www.vicphysics.org/jobregistration.html>.

Once the information has been submitted, the school will be contacted to confirm the bona fides of the vacancy and once payment has been made the description of the vacancy will be placed on the website.

If you have any queries about this service to schools, please contact us at the email address below.

We hope this service will facilitate the process of schools finding a replacement physics teacher.

Kind regards,

Dan O'Keeffe OAM
Coordinator,
